SUSTAINABLE ERGONOMICS - ERGONOMICS FOR SUSTAINABILITY

NEW DEADLINE

It is now well known that sustainable development requires the convergence of complex and often disjointed multidisciplinary knowledge, such as economic growth, social equity and environmental protection. First introduced in the Brundtland Report (1987), sustainable development is defined as development that meets the needs of the present without compromising the ability of future generations to meet their own needs. Therefore, a key element is the consideration of a long-term welfare perspective covering the entire socio-economic system to ensure that improvements occurring in the short term do not prove detrimental to the future state or development potential of the system. In this scenario, it is necessary to implement conscious models and practices that integrate effective environmental protection, prudent use of natural resources, social progress that recognises the needs of all, and the maintenance of high and stable levels of employment and economic growth. More recently, the 17 Sustainability Goals defined by the United Nations (2015) have made explicit the goals towards which contemporary society must strive to end poverty, fight inequality and enhance social and economic development, in consideration of people, planet and profit, emphasising aspects of fundamental importance today, such as climate change and environmental protection. The awareness emerges that sustainable development is characterised by a dual dimension of complexity, global and local, determining multifactorial conditions that must be addressed at the most appropriate scales and with integrated multidisciplinary approaches. With the National Recovery and Resilience Plan (PNRR), the Italian government has directed its investments in the immediate future towards the ecological and digital transition of our country, for a structural change in the economy, starting with the fight against gender, territorial and generational inequalities, thus demonstrating that it wants to adopt, after the pandemic crisis, a strategy that is partly consistent with the objectives of sustainable development.

The Italian Review of Ergonomics, in the year 2022 intends to develop these themes, stimulating reflections on the synergies between the human factor and sustainability, to understand the role that ergonomics can also provide concerning the themes that the PNRR missions introduce such as:

- Digitalisation, innovation, competitiveness, culture and tourism
- Green revolution and ecological transition
- Sustainable mobility: products, services and infrastructure
- Education and research
- Inclusion and cohesion
- Health and well-being
- Creative manufacturing and new working practices

Issues 24 and 25 of the journal are intended to collect contributions based on critical essays, scientific research or professional and project experiences that contribute to open a discussion on the potential of ergonomics methodologies and tools for responsible and equitable development.

DEADLINES **EXTENDED**

NUMBER 24

Articles must be received by **September 30th, 2022**

Number 24 publication is expected by **November 30th 2022**

EDITORIAL RULES FOR AUTHORS

GENERAL INFORMATION

The articles must be sent in word-compatible format (.doc, .rtf) by e-mail to the following addresses:

segreteria@societadiergonomia.it

Each article must be submitted both in Italian and in English.

Each version (ITA and ENG) has to include: title, author/s name, abstract and bibliography

Each version must have a maximum of 25,000 characters included spaces.

In particular:

The abstract length shall range between 100 and 250 words

Provide complete names and affiliations of each author

A short-bio of each author is required. Its maximum length is no more than 100 words each.

They are excluded from the overall counting.

Articles may be submitted for the section "Studies and research" or for the section "Profession and project". Articles submitted for the section "Studies and research" will be double-blind reviewed.

IMAGES AND TABLES

The images should not be put in in the text, but separately sent, attached to the email in .jpg or .tiff format

The required resolution is 300 dpi.

Images and tables should be numbered and positioned in the text as cross-references (e.g. [Figure 1])

REFERENCES IN THE TEXT

References in the text include (name/s, date) as in the following examples:

(Jones, 2001)

(Robsen, Hudson, Hutchkins, Ru, & Selanis, 1989)

(Smith et al., 2005)

REFERENCE LIST

The reference list at the end of the text shall be in alphabetical order (per surname of the first author)

References by the same author (or by the same group of authors in the same order) shall be arranged by year of publication with the earliest first.

In case of multiple co-authors, separate the names with the comma and "&". Do not use the formula "et al."
