**Nota 9.4.2021**

Dear Bernard and dear FEES friends,

It was nice to see and hear you all in the FEES meeting one day ago. The administrative topic was very important to address, even though we did not have enough time to talk about other topics. As it was meant to be, given the facing of the statutory change.

I am writing to you Bernard, Pedro, Jula and Pascale to share an opportunity the SIE (Italian Ergonomic Society) is trying to take within EU findings coming with the recovery plan.

There is a great deal referring to the green transition, it involves the design, promotion, and valorization of ancient walking routes, like the one connecting Canterbury with Rome and many others routes.

In the local SIE group (CC to this email) active in the area of Rome, there is a strong track of records regarding the ergonomic of walking routes.

The ongoing activity is developing at the regional and local level as the requests for funding need to be initiated at the local level.

This e-mail is an attempt to establish synergy and collaboration.

Primarily we would like to investigate if you are aware of the existence, within the FEES, of groups with similar scopes on ergonomics of walking routes.

The second aim is to ask you to consider if this is a possible source of funding among FEES delegates. Eventually, we could support raising awareness on this.

The third aim is to investigate the possibility of creating contacts among national interest groups already active - if any- on this topic referring to projects on walking routes proposed within the local administration.

Thanks for your collaboration

Hope to see you all soon

Giulio Toccafondi
